

**2009-2010 Career and Technical Education Program  
Web-based Offerings  
Serving Region 10 Schools**

Unless otherwise specified, these titles are available to Region 10 teachers via the internet as of 07/01/09.

**CTE Program Evaluation and Assessment *NEW***

This strategy for evaluation is web based and employs the use of webinar technology to help teachers develop strategies for examining their programs. Like the campus based version of this offering, emphasis is placed on emerging CTE trends, cross curriculum instructional strategies, data collection and assessment, PEIMS coding compliance, guidance and counseling (4 year planning), teacher training and student certification opportunities. Instruments for program examination are discussed at length and the experience is designed for individuals and small groups.
