

General Curriculum and Assessment

Assessment Strategies

Higher level question stems, rubrics, use of graphic organizers, and data analysis are just a few of the 8 assessment strategies that will be presented in this workshop. Teachers who attend will be able to breathe new life into their old assessments and create new and more rigorous assessments.

Checklists and Rubrics

Workshop will focus on developing rubrics and checklists for differentiated instruction and assessment.

CSCOPE

5 Big E's

Become familiar with the components of the 5E Instructional Model from the view of an administrator, teacher and student.

It's All About Asking the Right Questions

By asking the right questions...kids get the right answers! Use guiding questions to help students develop key understandings.

It's NOT Teaching to the Test...It's Teaching to the IFD!

Learn how CSCOPE assessments are developed and the best strategies to insure success with their use. Alignment with the IFD and levels of rigor will be addressed. See how WebCCAT can be used to modify CSCOPE assessments.

Librarians and CSCOPE

Librarians, do you want to make connections with your teachers for easy CSCOPE collaboration? Would you like to help your teachers match books and resources to their lesson plans? This is the session for you! Limited to librarians in CSCOPE districts.

Making CSCOPE and Your Adopted Textbook Work Together

Using your textbook and your IFD's, participants will create a correlation document to maximize use of state adopted resources.

Recipes for Managing Cooperative Groups

Sometimes it seems like putting students in groups is a recipe for disaster. We'll gather the ingredients for managing groups that will be a recipe for success!

Using Performance Indicators to Boost Student Achievement

Participants will learn to make the process, content and product connection. Learn how to use the Performance Indicators to measure and increase student achievement.
