

STATE DYSLEXIA TRAINING:

*Writing Productivity Profile
Assessment and Technology-
Based Strategies*

Written expression is a complex task, requiring the integration of effective motor, encoding and linguistic-cognitive abilities. In the course of this workshop, participants will learn the developmental progression of early writing skills and learn about the barriers which interfere with effective writing for students with special needs. Participants will discover an efficient 4 step process for assessing those variables that are affecting a student's written productivity. With a focus on functional outcomes in written expression, this offering is presented by Denise DeCoste, Ed.D, O.T.R. Dr. DeCoste is a nationally recognized educator and author in assistive technology. She serves as an Assistive Technology Specialist with the Montgomery County Public Schools in Maryland and is the author of *Assistive Technology Assessment: Developing a Written Productivity Profile*.

Date: Friday, May 8, 2009

Time: 8:30 A.M. — 4:00 P.M.

*Location: Region 10 Education Service Center
Abrams Building
904 Abrams Rd.
Richardson, TX 75083*
