

Mentoring Program for Occupational and Physical Therapists

A mentoring program for OT's and PT's within Region 10 is available to support therapists new to the school environment who do not have a local therapy support system. This program connects a therapist with an OT or PT colleague to assist with those challenging first years in the school system. Mentoring is designed to provide information, guidance, and feedback to promote professional growth.

This program is offered at no cost to the LEA/SSA. A request form signed by the Director of Special Education is required.
