Have you ever wondered if there is anything in the realm of assistive technology that would assist your students in efficiently accessing the general curriculum? Potpourri of Assistive Technology is designed to do just this by providing a view of what is now available with some practical applications in curriculum areas you may not have considered. Both high and low technology hardware and software will be presented in this center-based workshop. You will have opportunities to observe demonstrations, ask questions, and participate in some “hands-on” activities. The session will conclude with a current report on trends in the field and what to watch for on the horizon.

See you on November 16!
