

# SUPPORT STUDENTS. INCREASE FUNDING.

## MAXIMIZE OUTCOMES-BASED FUNDING

Hosted and supported by Region 10 ESC in Richardson, Texas, CCMR Insights is a web-based software tool designed to help school staff get and keep high school students on track for Career, College, and Military Readiness (CCMR). The tool also helps Texas schools maximize CCMR A-F accountability ratings and HB3 outcomes-based funding. Given the impact of the COVID-19 crisis, data tools to identify and drive action are more important than ever.

The system feeds automatically from the district or charter school's student information system via the Ed-Fi data standard. Compatible student information systems currently include Skyward and Focus, with more such as Ascender, Powerschool, and eSchoolPlus planned in the near future.

### CALCULATE & MONITOR

Calculate your projected A-F CCMR accountability score in real time. Monitor your projected CCMR scores by district/charter and campus.

### PREDICT FUNDING

Predict the Outcomes Bonus funding your district will receive to inform plans to reinvest those dollars in CCMR programs.

### DEVELOP ACTION PLANS

Use the detailed student-level view to develop tailored action plans that will help students attain their college, career and military readiness goals.

### IMPROVE OUTCOMES

Develop evidence-informed strategic action plans that will help your district drive a cycle of continuous improvement.
