Texas Education Exchange

Introducing
The Exchange

Texas is building for the future by offering **The Texas Education Exchange** (The Exchange), a statewide data solution that provides PK-12 districts and educators with tools and insights to bolster student success. The Exchange is built on Ed-Fi, a data standard or set of rules that establishes a unified structure for education data.

Leveraging Ed-Fi, The Exchange unites disparate data sources to streamline the data-sharing process and provide actionable insights for educators. With data that works for them, educators can help students succeed.

Led by the Region 4 Education Service Center based in Houston, the statewide collaboration includes four founding members: Region 10 (Dallas), Region 11 (Fort Worth), Region 13 (Austin), and Region 20 (San Antonio). The Exchange successfully launched to all regions and districts across Texas in October 2023. **The Exchange is available at no cost through August 2024. Districts who enroll by August 31, 2024 never pay an onboarding fee.**

What issues can The Exchange solve?

Siloed information
→ Efficient data standards alignment & integration

Cost
→ Best-cost options for tools that meet your needs

Inaccurate, slow information
→ Wrap-around services enhancing data utilization and analysis and security

Insecure data transfers
→ Enhanced security through established practices with secure software design and full data ownership
