

Workshop Offerings

Eduphoria Essentials for Teachers - 6 hours

This session is specifically designed for teachers using Eduphoria applications for the first time. Teachers attending this training will develop skills to navigate the Eduphoria instructional applications (Aware, Strive, and Forethought).

** This training can be split into 3 modules- Aware (3 hours), Forethought (2 hours) and Strive (1 hour)**

Moving Past Analysis Paralysis - 3 Hours

Data analysis is a critical piece to improving student learning, but to be effective, it must result in a change in practice. This session is designed to engage participants in protocols that help move from just looking at data in Aware to acting on data.

Building a Balanced Assessment Program - 3 Hours

Better assessments = better data. Learn how to use the Eduphoria test-authoring platform in Aware to streamline the process of creating assessments. With technology so easy to use, you can focus on making great assessments to measure student learning! A preview of the item banks inside Aware will be provided.

I Got This Job, Now What? Eduphoria Applications for New Campus Administrators – 6 hours

This session is specifically designed for new administrators using Eduphoria applications. Administrators attending this training will develop skills to navigate the Eduphoria instructional applications (Aware, Strive, and Forethought).

This training can be split into 3 modules - Aware (3 hours), Forethought (1 hours) and Strive (2 hours)

Beyond the Basics: Advanced Eduphoria for Administrators – 6 hours

This session is targeted toward administrators who are intermediate Eduphoria users. Administrators attending this training will develop more advanced skills in the Eduphoria instructional applications (Aware, Forethought, and Strive) including tracking growth, creating monitor groups, and running analytic reports.

This training can be split into 3 modules - Advanced Data Analysis in Aware (3 Hours), Using Data to Inform and Coach the Lesson Planning Process in Forethought (1.5 Hours), Using Appraisal Analytics in Strive (1.5 hours)

Customized Eduphoria Consultations

Developing Inventories in Aware for Administrators – 2 hours

Using the Eduphoria aware data tool, district administrators will learn how to create and set up a student inventory framework, create an assessment, assign it to students and administer the assessment.

Aware Student Forms for Administrators – 2 hours

Participants will learn to create, edit, and assign a custom form to students as well as how to use journals and the forms community in Aware.

Managing your Curriculum in Forethought - 3 to 4 hours

Eduphoria Forethought is a simple lesson planner and curriculum management application that was created with teachers in mind. In this session, district curriculum managers will learn how to set up their curriculum tree, add scope and sequence, and any district resources.

** This needs to be done before teacher training on lesson planner.**

Getting your Eduphoria Suite Ready for Next Year - 2 to 3 hours

To smoothly transition from one year to the next, system administrators must complete certain tasks. In this customized consultation, we will discuss and answer questions related to archiving, calendars, and other housekeeping recommendations.
