

Imagine a classroom powered by cognitive technology that transforms and personalizes the teaching and learning experience

We understand teachers' challenges

Educators are under enormous pressure to assess students, ensure mastery and meet state standards. However, there's little time to develop plans that keep students engaged, and personalize learning experiences based on a deeper knowledge of students' interests, strengths and weaknesses.

IBM Watson Classroom makes teachers' lives easier

IBM® Watson® Element and IBM Watson Enlight tackle these challenges by applying Watson cognitive capabilities to education.

IBM Watson Element

Designed exclusively for iPad, this app provides teachers a single 360-degree view of students by consolidating various academic, social and behavioral data sources.

IBM Watson Enlight

Offers a unique browser-based experience and provides deeper insights and lesson planning leveraging the school's data and data collected on iPads in the classroom.

Realize amazing outcomes in the classroom

Challenges	IBM Watson Classroom Benefits	Outcome
Partial or incomplete view of individual student strengths, weaknesses and interests	Data-driven insights	Provides a 360-degree view of students, including academic, social and behavioral
Manually developing individualized classroom plans	Student-centric learning	Helps teachers craft targeted learning experiences from trusted content
Disparate sources of student information	Student data via a single source	Supports universal sharing of data for improved learner outcomes

Why IBM?

Our education clients recognize IBM for our unique combination of:

Cognitive technologies to transform teaching and learning

Big data and analytics capabilities to empower teachers

Secure and scalable cloud-based solutions to support the entire education enterprise

“As an educator, I love the fact that IBM Watson Element paints a picture of the whole child. The learner is more than a number or a grade. I can add information about the child’s interests and learning style, or add other notes that will not only help me, but their future educators.”
